

Scale Hacker Pack

Tonetracer

This pack is part of the Tonetracer reference library. To download more free guides, visit tonetracer.com

Thanks for downloading the Tonetracer Scale Hacker Pack reference guide. Here are some quick notes about the features included in this pack, as well as some general pointers about how the visual design system works.

- 1) All the scale material in this pack uses a standard five box system that covers twelve frets.
- 2) Each of the five box shapes are color coded, along with the modes they unlock using Anchor Points.
- 3) Because each note is part of two boxes, some scale charts utilize a "split-color" feature to reflect this.
- 4) There are seven Anchor Points found along the Low-E String within the five boxes. Using these Anchor Points, the player can easily use these as the "root note" to setup box positions for all seven modes.

There are seven modes built into the natural 7-note major scale. Depending on which note is chosen as the root (or starting position), the corresponding mode will "unlock," and feature a unique scale. Each box shape and mode in this guide uses a specific color for identification. Like chords, the 3rd of each mode's scale determines if the mode is major or minor.
